STAT

SUBJECT:

SNIE on UAR Missile Prospects

1. The White House has requested, for completion on an urgent basis, an estimate of probable United Arab Republic missile developments over the next five years, and the implications of such developments.

2. It is requested that your representatives meet with us at 1400, Friday, 22 November, at CIA Headquarters for an oral contribution session. We would hope to discuss the following matters, among others, with you at this time.

a. What developments have occurred in the UAR missile program since the completion of SNIE 30-2-63?

b. How many missiles--of what types--is the UAR likely to produce and deploy over the next five years? What would such a program cost?

c. What will be the capabilities of the UAR missiles? We will want to discuss CEP, warheads, reliability, and salvo capability.

d. What effect will the UAR's probable missile strength have on Israel, both military and psychologically?

~~S-E-C-R-E-T~~

GROUP 1
Excluded from automatic
downgrading and
declassification

S-E-C-R-E-T

For example, would the UAR's possession of some 1,000
SSM's enable the UAR to disrupt Israel's mobilization
efforts in the event of a surprise attack?
